

CRIMPING TOOL: CT-HSB

Description

Hand held manually operated 3 jaw crimping tool with ratchet mechanism for complete controlled crimp cycle. For use with red, blue & yellow heat shrink butt connectors .

Can be supplied with calibration certificate if required.

Features

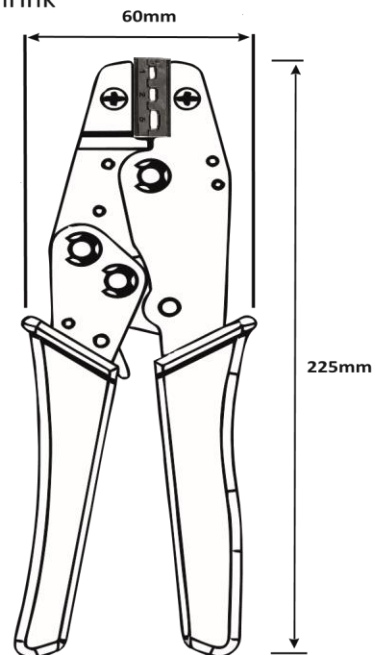

High precision cast jaw set for optimum compression.

Emergency release lever for detachment of ratchet control during crimp cycle.

Automatic opening of crimp tool on completion of crimp cycle.

Calibration / load adjustment cog.

Ergonomically designed moulded plastic handles for reduction of operator fatigue.

Application

For crimping of standard heat shrink butt connectors 0.5mm^2 to 6.0mm^2 . Meets the compression ratio requirements of BSEN 60352-2:2006.

Jaw1 - Red heat shrink terminals (0.5mm^2 to 1.5mm^2).

Jaw2 - Blue heat shrink terminals (2.5mm^2).

Jaw3 - Yellow heat shrink terminals (4.0mm^2 to 6mm^2).

Material specification

Jaw set: carbon steel grade SCM440

Frame: material steel grade S45C

Handles: Polypropylene
